Retention Rates

In accordance with the Higher Education Opportunity Act (HEOA) of 2008 and in addition to the Higher Education Act of 1965 (as amended), each postsecondary educational institution must disclose information about retention rates to current and prospective students.

The retention rate is a measure of the rate at which students persist in their educational program at an institution, expressed as a percentage. This is the percentage of degree- or certificate – seeking students from the previous fall who either re-enrolled or successfully completed their program by the current fall.
